8GB, 16GB, 32GB, 64GB  
128GB & 256GB

The DVR (Driving Video Recorder) begins recording from the moment you start your car to when you park. The high quality video & audio can be used as strong evidence in the event of an accident or to absolve yourself from any wrong doing of traffic infringements.

The built in motion sensor that will activate upon impact or shock, can provide valuable monitoring of your vehicle when parked in public areas or your home.

Perfectly suited for small to large businesses with a fleet, or a hand full of cars. Monitoring driver behavior of employees & contractors.

With no batteries required there is no hassles or ongoing costs with the DVR system.

**Wide  
Angle  
Recording  
View**
